The concept of **“Sore”**, which inspires **Cihanoğlu's** entire artistic creation process and whose influence becomes stronger in this exhibition, means more than just physical trauma to him, and he is more concerned with the psychological effects of the sore. Their production can be read as the expression of the loneliness, fragmentation and the dilemma that we have experienced in the process that begins with the breaking of the human from the womb at the time of birth, and the expression of the spiritual pain and the resistance against this pain.

In **“Sore”** exhibition, the objects that we do not notice, ignore or pass by, sometimes turn into objects of desire, formed by Cihanoğlu's passions, aspirations, fantasies, ambitions. In the depths of our collective subconscious ranging from the hidden passions to fetish from fantasies to our childhood memories in the life, reflection of almost all the issues directly related to human, finds an expression with Cihanoğlu's artistic interpretation.
